Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 11 objected to because of the following informalities: line 5 of the claim states that the "absorbent article is adapted for use of a user..." The language does not make sense. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 19, the claim recites a minimum distance of 0,1 mm. It is unclear what the applicant intends to claim as an invention. This language is unclear and requires clarification and/or correction.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 – 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Linman et al. (US 4,681,793).

With respect to claims 11 – 14, 17 – 18 and 20 – 21, Linman et al. (hereinafter “Linman”) discloses a breathable backsheet comprising a water vapor permeable first layer (25) and a water vapor permeable second layer (20) for an absorbent article (10) comprising an absorbent body (30) adjacent the first layer, said absorbent article being adapted for use of a user such that the absorbent body during use faces towards the user and such that an outside of the backsheet faces away from the user (figure 2), the backsheet being water vapor permeable in a direction from the absorbent body to the outside of the backsheet, in a Z-direction (col. 6, lines 34 - 36), characterized in the backsheet comprises a condensation zone (figure 2) creating a space between the first layer and the second layer wherein the layers are fully capable of performing the recited function as set forth in figure 2. The hydrophobic distance elements comprising a number of hydrophobic particles are 21 and they are considered to be arranged to condense water vapor as set forth in col. 6, lines 54 - 60. Further, the structures comprise a three dimensional layer as set forth in col. 6, lines 60 - 65.

Regarding claims 15 - 16 and 22 - 23, see figure 3.

As to claim 19, the examiner contends that minimum distance is at least 0 mm because of the space provided by the protuberances as shown in figure 2.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michele Kidwell whose telephone number is 571-272-4935. The examiner can normally be reached on Monday thru Friday.
